I P S O : un programma per la perequazione analitica della curva ipsometrica

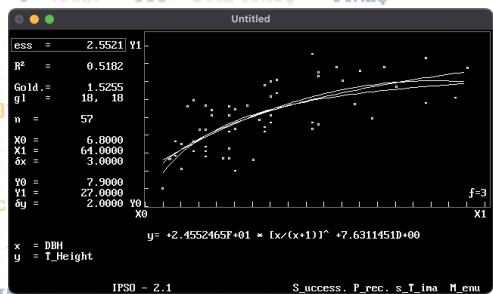

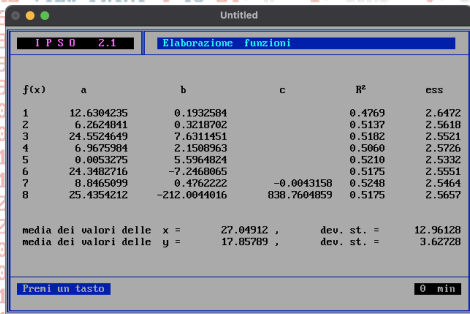

A. Ferrara & P. Corona (*)

(*) 1990 - Monti e Boschi XLI (5):50-54

A restored software for hypso-diametric regression analyses. To experience the thrill of 1980's programs, and more...

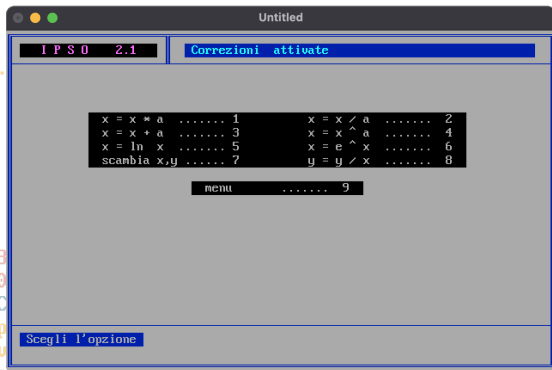

8 different functions that cover almost all the curvature ranges for hypso-diametric functional relationships, and more...

All functions and related statistical indicators are quickly accessible, as well as 'y' estimates. Single and multiple function graphs are also allowable.
